Sedona Hills

Midnight Sun

WOODRx is suitable for both interior and exterior applications. Apply with a brush, roller or spray. WOODRx is formulated to allow the grain and wood color to show through. Colors shown above have been applied to pressure treated lumber and approximate the actual color. Semi-transparent colors and their degree of transparency vary with wood type, color, texture and porosity. To insure the exact color you want, apply to a small area of the surface to be stained.
